Defense Venture Timeline

I Week Exposure

An effective toxic exposure case begins with accurate testing. We recommend and work with environmental experts to ensure that the appropriate testing is done—and to ensure that the testing links.

II Week Litigation

Damage Analysis

We assist clients and attorneys to identify and calculate the kinds of damages that can be recovered in these cases. We believe that environmental exposure can cause very real and long lasting harm that should be calculated and compensated accordingly.

III Week Consulting

We have worked with many of the best experts in the field, and we are continuing to cultivate new experts to testify in state and federal court on critical medical and exposure issues.

IV Week Decision

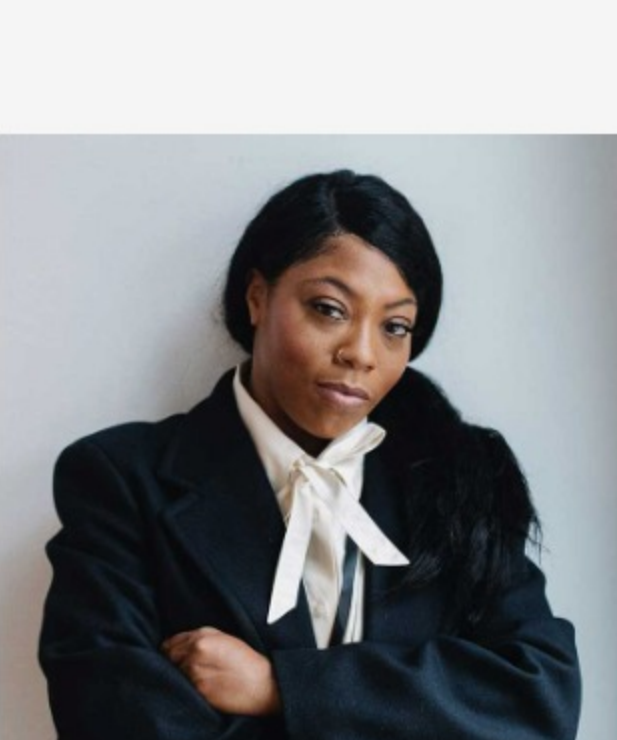

Arbitration or Trial

We brainstorm with counsel as to the best case themes and witness exams. McKee's experience is particularly valuable here as well, as his most recent jury trial resulted in a \$48 million verdict for a single plaintiff. These are real and valuable injuries that need to be presented competently.
